

Electric Quilt Software Supply List

Bring your **laptop** loaded with EQ6 if you have one. Before coming to class, please try to open EQ6 on your laptop to make certain that your downloading was successful. If you don't have a laptop, you are welcome to sign up for class and follow along. Several students have done this when trying to decide whether to buy EQ6. These students found the session helpful and went on to buy and use EQ6.

Bring the **User Manual** that came with your EQ software. It is a well-written guide. I refer to it often.

EQ6 has many cool features and we will highlight those we can in the time we have. My goal is to enlighten students but not to overwhelm. No quilter will be left behind. We will support each other and work through the software together.

If you have any questions let me know.
See you at the Quilt Patch.
